**THE POWER COMPANY**

**GET MOWING!**  
**GET THE GARDEN BULL!**

## ***PREMIUM QUALITY HAS ARRIVED FOR TRACTOR MOWERS!***

For some eighty years, Banner has been producing highly efficient and innovative starter and industrial batteries. Today, the company supplies automotive, motorcycle and commercial vehicle manufacturers, as well as the free component market via its branches and direct importers in over sixty nations around the world.

Banner also places a special emphasis on a successful and comprehensive range of offers for sport and leisure. Its reliable battery power starts motorcycles, quads, jet skis, all-terrain vehicles, scooters, snowmobiles and as of now, gardening machines such as tractor and ride-on mowers.

## ***Banner GARDEN BULL – THE NEW POWER FOR LAWNS!***

The GARDEN BULL has been developed specially for garden mowers and offers the very latest battery technology, which incorporates long service life, excellent performance, outstanding reliability, a low self-discharge rate and high levels of cold start power. How powerful a battery really is shows the performing during the first start after the long, winter break.

## ***THE REAL POWER DEAL!***

**REALLY PRACTICAL!** Every GARDEN BULL is delivered with an enclosed pack containing a precisely measured amount of electrolyte. The battery is dry pre-charged, which means that once filled with electrolyte it is immediately ready to use and does not require charging.

**REALLY SAFE!** When installed vertically, the GARDEN BULL is safe against tipping and leaks.

**REALLY POWERFUL!** Owing to its top quality design, the GARDEN BULL offers up to 30 % more starting power than standard batteries. It is therefore also ideal in winter when tractor mowers are used for snow clearance.

## SUITABLE FOR OVER 90 % OF ALL TRACTOR MOWERS!

The Banner GARDEN BULL is available in six powerful versions with 18 to 30 Ah and naturally enough, during its design the type of terminal generally used for ride-on mowers was taken into full account.

THE POWER COMPANY

## HOW TO KEEP THE GARDEN BULL IN TRIM!

### OPTIMUM CHARGING – OPTIMUM PERFORMANCE.

Only a fully charged GARDEN BULL can deliver full power and the ideal charging current amounts to 10 % of battery capacity. Therefore, a 24Ah battery is best charged with 2.4A.

**The Banner ACCUCHARGER 3A** (Item no. 124000030) charges batteries fully automatically and once charging has been completed switches over to maintain mode, which is perfect during long standstills. Moreover, thanks to its large LED display and user guidance, the ACCUCHARGER offers clear and straightforward operation.

### BATTERY TESTING MADE SIMPLE.

Using the digital **BBT DV1** voltmeter (Item no. 1210000121) testing the GARDEN BULL is very easy. The handy device is suitable for all 6/12V and immediately provides a precise measurement. Using this overview on the device, the GARDEN BULL's charge status can be read off directly.

### REGULAR CHECKS FOR PROLONGED SERVICE LIFE.

The GARDEN BULL is maintenance-free, but its service life and performance can nonetheless be maximised by means of the following simple measures:

1. Check the acid level and if necessary top up with distilled water.
2. Keep the battery and the terminals clean.
3. Make sure the clamps and cables are sitting firmly.
4. Examine the battery casing for damage.

**DETAILED INFORMATION IS SUPPLIED WITH EVERY GARDEN BULL!**
